--	--

Projects	<b>Personalized Hospital Appointment Management System (App and Website)</b> Developed a comprehensive system for managing hospital appointments, integrating both web and mobile platforms. Utilized Flutter and EJS for the frontend, with Flask and Express.js handling the backend. The database was managed using MongoDB.
	<b>Hotel Table Service Website</b> Created a responsive website for managing hotel table reservations and service requests. Implemented the frontend using HTML, CSS, and Bootstrap, while the backend was developed with Django.
	<b>Blood Donation Website</b> Designed and implemented a website to facilitate blood donation registration and management. The frontend was built with HTML and CSS, and the backend was developed using Flask.
